

Our Products

Our animal products offer a method of relieving swelling and discomfort, by using a cannabinoid delivery topical liniment with the benefits of cannabis therapy. This method does not have any motor dexterity loss, no drowsiness and no inebriation, unlike ingested forms.

The product is applied topically, by spraying, washing or topical poultice. Once applied the mixture of CBD oils and Essential oils are absorbed through the skin and interact with cannabinoid receptors in the body and tissues of a mammal. As a result, this produces therapeutic pain and anti-inflammatory effects without undesirable psychotropic side effects.

**All natural ingredients
with no chemicals!**

Topical Spray & Wash

Topical Poultice and Soak

Wound Salve

Along with CBD, our other ingredients include:

Arnica - Derived from the arnica flower of the sunflower family, arnica oil helps reduce inflammation

Turmeric - Cleanse wounds, reduce inflammation and promote healing

Celery Seed - Reduces muscle spasms and cramps, anti-inflammatory agent
